The problem of bias in word embeddings

Man:Woman as King:Queen

Man:Computer_Programmer as Woman: Homemaker X

Word embeddings can reflect gender, ethnicity, age, sexual orientation, and other biases of the text used to train the model.

[Bolukbasi et. al., 2016. Man is to computer programmer as woman is to homemaker? Debiasing word embeddings]

Addressing bias in word embeddings

2. Neutralize: For every word that is not definitional, project to get rid of bias.

Beam search discussion

large B: better result, slower
small B: worse result, faster

Beam width B?

$1 \to 3 \to 10, \quad 100, \quad 1000, \to 3000$

Unlike exact search algorithms like BFS (Breadth First Search) or DFS (Depth First Search), Beam Search runs faster but is not guaranteed to find exact maximum for $\arg\max_y P(y|x)$.

Error analysis on beam search

Example

→ RNN

→ Beam Search

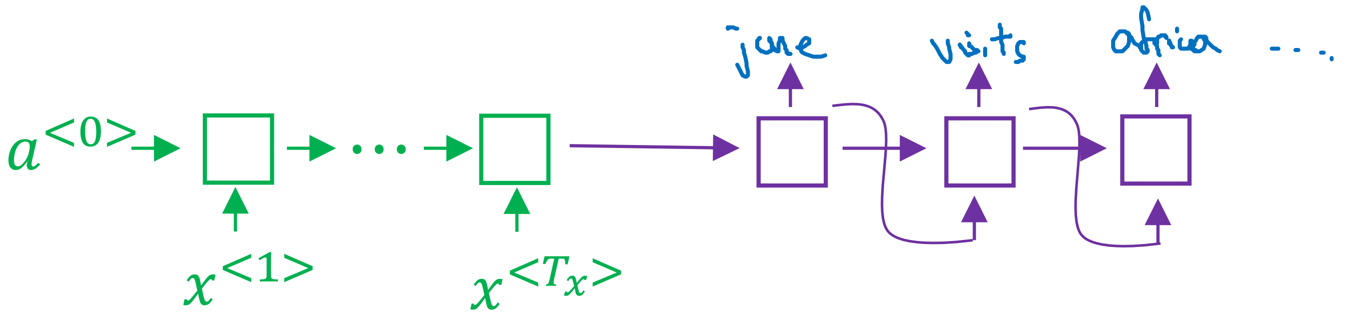
$\boxed{B\uparrow}$

Jane visite l'Afrique en septembre.

Human: Jane visits Africa in September. (y^*)

Algorithm: Jane visited Africa last September. $(\hat{y})$ ⇐

RNN computes $P(y^*|x) \ \overset{>}{\leq}\ P(\hat{y}|x)$



Error analysis on beam search

$P(y^*|x)$

$P(\hat{y}|x)$

Human: Jane visits Africa in September. (y^*)

Algorithm: Jane visited Africa last September. ($\hat{y}$)

$\arg\max_y P(y|x)$

Case 1: $\underline{P(y^*|x) > P(\hat{y}|x)}$ ←

Beam search chose $\hat{y}$. But y^* attains higher $\boxed{P(y|x)}$.

Conclusion: Beam search is at fault.

Case 2: $\underline{P(y^*|x)} \leq \underline{P(\hat{y}|x)}$ ←

y^* is a better translation than $\hat{y}$. But RNN predicted $\boxed{P(y^*|x)} < \underline{P(\hat{y}|x)}$.

Conclusion: RNN model is at fault.

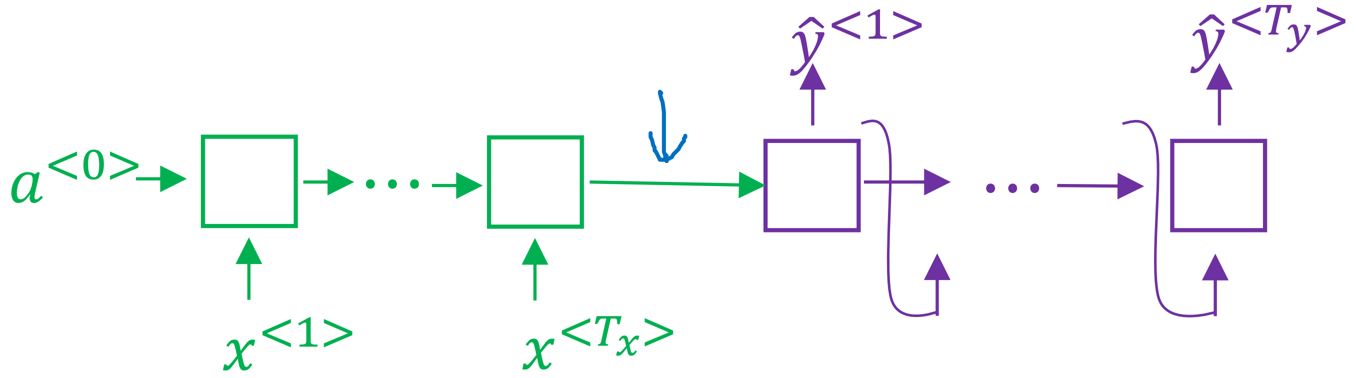
The problem of long sequences



Jane s'est rendue en Afrique en septembre dernier, a apprécié la culture et a rencontré beaucoup de gens merveilleux; elle est revenue en parlant comment son voyage était merveilleux, et elle me tente d'y aller aussi.

Jane went to Africa last September, and enjoyed the culture and met many wonderful people; she came back raving about how wonderful her trip was, and is tempting me to go too.
